Greenwood Street Construction Traffic Maintenance Plan

Ishpeming RD Water System Improvements
Contracts I, II, & III

The following is an overview of the Traffic control activities that will be implemented for this phase of construction.

1. Thru Traffic will be affected throughout construction activities in this area.
2. An Overall Detour for Thru Traffic will be established bypassing the entire area. Route will send traffic down Washington street and Lakeshore Dr. to bypass area for traffic using this way into and out of the downtown area. Additional Detours or signing will be updated in the field as necessary.
3. Homeowners will be notified a week in advance of actual street they live on being closed for construction activities. This will be ongoing and in sequence as shown.
4. Additional local traffic detours will be setup in stages to bypass smaller work zones as well.
5. Access will be available to the Robbins flooring mill, and Fast Stop Gas Station, as well as Carp Street **at all times**. If additional signs become necessary to better facilitate this operation, they will be added as needed.
6. Please **do not** park on the street overnight inside the construction work zone, we may be forced to tow your vehicle to avoid damage.
7. The entire area will use a combination of detours, lane closures with flag control, and temporary widening of lanes/shoulders throughout the construction process. We will try to keep this to a minimum, but it will be necessary in some areas.
8. ALS will keep backfilling operations running concurrently with excavation activities to limit the amount of open disturbance to the best extent possible.
9. Pedestrian access will be maintained throughout construction activities, but please be careful when walking through construction areas.
10. ALS will provide all necessary special needs accessibility to homeowners and businesses as needed, if you need assistance please contact the City of Ishpeming to have them forward you to the proper people to handle your requests.
11. Garbage will be picked up from the curb by ALS and transported to a designated pick up location as construction activities take place in the area. Please just put your garbage out as you normally would, we will take it from there. ALS will help with all dumpster locations as needed to ensure they are accessible throughout construction
12. Any other questions or concerns please contact the City of Ishpeming or A. Lindberg and Sons Inc.
